**NEW POLICY** Faculty at IIT Delhi in collaboration with Cornell University and Rocky Mountain Institute are working with Niti Aayog to identify a mobility transformation model for Indian cities.

**SAINTS AND SINNERS**

> For the new lifestyle, the role played by friendship has altered. It is no longer that the friend who is that one person you can tell anything. It is now a friend who is someone you can talk to about anything. This change is one of the factors that make life easier in the modern world.

**THE KEY CONSTITUENTS OF THE NEW PARADIGM PLANNED FOR INDIAN CITIES ARE:**

**SHARED, ELECTRIC AND CONNECTED**

IIT-D, Cornell faculty test new transport management system

**NEW POLICY** Faculty at IIT Delhi in collaboration with Cornell University and Rocky Mountain Institute are working with Niti Aayog to identify a mobility transformation model for Indian cities. The model aims to address the challenges of traffic congestion, air pollution, and the need for sustainable transport solutions.

**A SUSTAINABLE AND SOCIAL APPROACH**

A sustainable and social approach is needed to ensure the success of any transport management system. This includes consideration of factors such as the needs of different communities, the impact on the environment, and the financial viability of the system.

**TECHNOLOGY AND INNOVATION**

The model also takes into account the role of technology and innovation in transportation. This includes the use of electric vehicles, shared mobility solutions, and advanced transportation management systems.

**IMPACT ON THE COMMUNITY**

The impact of the new paradigm on the community is a key consideration. This includes the need to ensure that the new system is accessible to all and that it promotes social inclusion.

**EDUCATION**

The model also includes the need for education and training to ensure that the new system is effectively implemented and that the community is equipped to benefit from it.

**FUTURE OUTLOOK**

The future outlook for the new paradigm is promising. With the right approach and investment, it is possible to create a sustainable and socially responsible transport system that benefits all.
